

Criteria

In order to succeed as well as possible, we have developed some criteria for whom that may apply to become one of the social entrepreneurs with us:

You are about to start up or develop a socially beneficial product, service or business. The idea may well be at the draft stage. What you must have in place, however, is a detailed business plan and a good ability to follow through.

The sharing of knowledge and experience is completely essential in order for the office sharing to work as well as possible. Your willingness and ability to contribute here is very important.

You have an affiliation with Rogaland, and your solution can be realized in Stavanger.

Your solution is within the area of rehabilitation, young people, pure food or redesign/recycling.

The product, service or business can sustain itself financially.

Don't meet the criteria? Then we may not be right for each other. This doesn't mean that your idea is poor or that the company is not meant to be, just that you should focus elsewhere. Good luck! Perhaps we will meet again at a later date?
